

Latex Green

DUNLOP LATEX
EXCLUSIVE TO BFF FOAM CORP

Global Organic Latex Standard

Prepared from **Organic Raw Materials** using a **sustainable processing method**

Requirements to achieve a GOLS Certification:

- Natural Rubber only/No Synthetic
- Organic Production controlled from raw material to the consumer
- This certification is managed by the **Control Union** based in the Netherlands.
- All manufacturing is done in a socially responsible manner.

Carbon Neutralized

Latex Green is the World's First and only Carbon Neutralized Latex Foam Manufacturing Plant.

Benefits

- Each latex product contributes towards making our atmosphere **cleaner** and **greener**.
- Global Warming is the fastest growing concern on the earth today affecting our total environment system causing issues that are harmful for all living organisms on the planet.
- Carbon Neutrality is the **best solution** to reduce and prevent global warming as it is the process which reduces Green House gas emissions and drives the manufacturers to think green.

Think **GREEN !**

OEKO-TEX Standard 100

If an item has been certified for STANDARD 100, you can be certain that every component of the item has been **tested for harmful substances** and that the item therefore is **harmless in human ecological terms**.

Latex Green Dunlop is certified for Product Class I

Product Class I: Products for Babies up to the age of 36 months
